

Alpine Archaeological Consultants is a respected, full-service archaeological consulting firm established in 1987 to help clients implement their projects through compliance with historic preservation laws. For more information about Alpine, please visit our website: www.alpinearchaeology.com

We believe that the best way to help clients realize their project goals is to offer expert services, delivered in a timely and cost-effective manner. Alpine's commitment to excellence in consulting is exemplified by our corporate membership in the American Cultural Resource Association and by certification of staff archaeologists as Registered Professional Archaeologists (RPA).

Alpine's Organization

Corporate Background Alpine was founded in 1987 by its principals, Susan M. Chandler, Jonathon C. Horn, and Alan D. Reed. It is a small business that engages solely in contracted cultural resource studies throughout the Rocky Mountain West, Great Basin, and Southwestern states for private clients and federal or state agencies. The firm employs 20 full-time archaeologists, an Office Manager, and an Office Assistant. The archaeological staff includes specialists in artifact analysis, GIS, ethnobotany, historic archaeology, and prehistoric archaeology.

Alpine offers a wide range of cultural resource services, including preparation of cultural resource portions of Environmental Impact Statements, cultural resource overviews, research designs, treatment plans, National Register nominations, Historic American Engineering Record (HAER) packages, management plans, and historic research. Much of Alpine's work involves field investigations; these commonly consist of cultural resource inventories, ruins stabilization and assessment, archaeological testing, monitoring, and controlled archaeological excavations.

Facilities Alpine owns an office building at 900 S. Townsend Ave. in Montrose, Colorado, with 8,400 square feet of office, laboratory, and storage space. Secure artifact and record storage is available in Alpine's two fireproof vaults. Alpine's assets include a research library containing approximately 2,000 volumes; a 22-station computer network; two Hewlett-Packard LaserJet PS printers; a Xerox Phaser 6200 DX color printer; and an HP DesignJet 750C color plotter. Computer peripherals include a negative/slide reader, CD and DVD writers, tape drives, a color scanner, and a multimedia projector. Other office equipment includes a facsimile machine, three laptop computers, a Xerox 5334 copier, and GBC and thermal report binding systems. Alpine also has a wide range of computer software, including accounting, word processing, database management, statistics, and GIS applications. The corporation also owns a full range of archaeological excavation, survey, and laboratory equipment. Field equipment includes Trimble GeoExplorer XT Global Positioning System units capable of sub-meter accuracy; David White, Sokkia, and Ushikata transits; cameras; screens; shovels; and small excavation gear. Most transportation needs are met with Alpine's fleet of nine four-wheel drive vehicles. Alpine's fully equipped archaeological laboratory includes a Meiji EMZ-5 zoom stereo microscope, light tables, computers, and a fully equipped darkroom.

Alpine Archaeological Consultants, Inc.'s professional staff has extensive experience in cultural resource consulting. These staff members meet or exceed the qualifications established in the *Secretary of the Interior's Standards and Guidelines* (48 FR Part IV). Alpine's staff archaeologists have worked in every western state in the United States, with their primary focus being on the archaeology of Colorado, New Mexico, Utah, and Wyoming. Each member of Alpine's team has an excellent record for carrying research projects to completion. The responsibilities assigned to key personnel are those that most effectively utilize each person's expertise and capabilities.

Alpine Archaeological Consultants, Inc. provides a wide range of cultural resource services. Much of our work involves assisting development companies in complying with historic preservation laws, such as Section 106 of the National Historic Preservation Act or the National Environmental Protection Act. Alpine also assists public sector agencies in meeting their regulatory requirements in managing cultural resources. Alpine personnel have extensive experience working with the pertinent legislation and the regional cultural resources, which helps insure timely and cost-effective work performance.

Expertise

- Cultural resource overviews, research designs, management plans, and treatment plans
- Cultural resource sections of Environmental Impact Statements and Environmental Assessments
- Field inventory
- Archaeological testing and controlled archaeological excavations
- Construction monitoring
- Preparation of Historic American Engineering Records (HAER)
- Historic and prehistoric artifact analyses
- National Register nominations
- Macrobotanical and faunal analyses

**Indicates SCA eligible categories. See the SCA Matrix following the price list for additional information regarding these labor categories.

SCA MATRIX		
SCA Eligible Contract Labor Category	SCA Equivalent Code - Title	WD Number
Field/Laboratory Archaeologist	30021 ARCHEOLOGICAL TECHNICIAN I	05-2083
Assistant Crew Supervisor	30022 ARCHEOLOGICAL TECHNICIAN II	05-2083
Project Archaeologist	30023 ARCHEOLOGICAL TECHNICIAN III	05-2083

The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the matrix. The prices offered are based on the preponderance of where work is performed and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.
