

ALPINE ARCHAEOLOGICAL CONSULTANTS, INC.

FIELD ARCHAEOLOGISTS

Alpine is accepting applications for Field Archaeologists for upcoming survey work. By joining our team, you will have the opportunity to further develop your skillset while working on a variety of projects within our 12-state region. Projects are currently scheduled through the end of 2024.

Wages are based on experience, but range from \$21–\$24 per hour for crew members. Individuals may be trained as assistant crew chiefs on some projects and receive additional compensation. This is a full-time, temporary, hourly position with the potential for work into 2025.

Alpine provides a minimum of \$59/day per diem and single occupancy housing during all field sessions. Higher per diem may be provided based on the project's location. Our typical field sessions are 8 days on/6 days off; 10-hour work days. Company transportation is provided from our offices to the project area unless entire crew is flying. Travel time and airfare is provided for projects that are distant from our home base. Travel time on session work days is compensated. Alpine provides paid sick leave upon hire and paid personal leave is accrued after working 160 hours.

Responsibilities:

The successful candidate will conduct cultural surveys in support of cultural resources management work under the supervision of our Project Archaeologist, with direction from the project's Principal Investigator. This position will assist in the timely and comprehensive completion of survey work, including accurate data collection. This position is entirely field based and requires the ability to regularly perform physical work, including, but not limited to, the ability to walk up to 8 miles a day (sometimes in rugged terrain). The position may also require the ability to stoop, sit for long periods, carry heavy objects, and use hand tools for digging and scraping.

Qualifications:

Candidates for this position should have completed college-level course work in archaeology, anthropology, or a related field—a B.A./B.S. degree in anthropology or closely related field is preferred. A minimum of one month of survey or excavation field experience and/or the successful completion of an accredited field school is required. Experience in the western U.S. is highly desirable, but not required. The ability to use a GPS unit and/or possessing a basic understanding of lithic technology or ceramics is a plus.

How to Apply:

For consideration, please submit your curriculum vitae or resume outlining education, previous field experience, and all relevant qualifications via our webpage at:
